Re: Well Decommissioning  
14-58 Charlotte Street  
Rochester, New York

Dear Mr. Biondolillo:

On June 20, 2006, a Day Environmental, Inc. (DAY) representative observed the decommissioning of three overburden groundwater monitoring wells (designated as MW-1, MW-4, and MW-5) and two overburden/bedrock interface groundwater monitoring wells (designated as MW-10 and MW-11) at the above-mentioned Site by SJB Services, Inc. (SJB).

Groundwater monitoring wells MW-1, MW-4, and MW-5 were decommissioned by removing the curb boxes, PVC risers and PVC screens, and subsequently backfilling the open boreholes with clean sand up to the ground surface.

Groundwater monitoring wells MW-10 and MW-11 were decommissioned by removing the curb boxes and PVC risers to a depth of approximately two feet below ground surface (bgs), backfilling the bedrock zone (as determined by test boring logs) with grout, and then backfilling the overburden with clean sand up to the ground surface.

If there are any questions, please contact this office.

Very truly yours,  
Day Environmental, Inc.

  
Tony DiNardo  
Project Engineer

  
Jeffrey A. Danzinger  
Project Manager
